

'Building on the Commitment'

Shuttleworth College, Bedfordshire

10 November 2009

Delivering provenance, quality and value

Network Grain^{UK} invite you to attend the UK's first central storage conference

Why you should attend:

NetworkGrain UK aims to support the development of central storage by helping its members secure contracts with high value markets at home and abroad. Going forward the network wishes to build on the commitment of stores. By working together to support improvements in efficiency, enhanced customer service and a right first time approach to quality the best customers will value the service provided by stores. This will allow the network to continue to grow and farmer member benefits to be delivered. The conference speakers will outline how realistic the aspiration of the Network is and the steps we need to take to deliver value to customers.

Conference Programme
